Ontario's labour market recorded another strong year in 2022

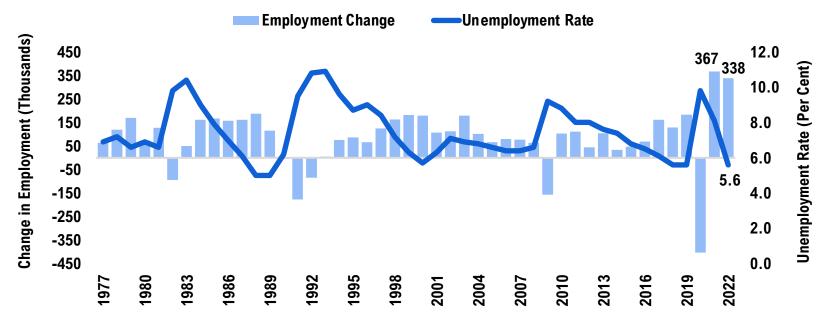

t

Record job gains in Ontario during the past two years

- Ontario gained 338,300 jobs (4.6 per cent) in 2022. When combined with the rise in 2021, this marks the strongest two-year period of job gains on record.
- The annual unemployment rate in the province dropped to 5.6 per cent in 2022, the same as the pre-pandemic rate observed in 2019.

Job gains were widespread in 2022

- The strong increase in employment in 2022 was experienced across all major age groups, and for male and female workers.
- Weakest pace of job gains were experienced by workers 55 years and older. After declining for two consecutive years, the number of retired workers 55 years and older increased by 41.8 per cent in 2022.

All major types of workers saw employment growth

- The majority of job gains in 2022 were concentrated in full-time, private sector, and permanent positions.
- Self-employment in Ontario increased modestly following two years of decline and may reflect record job openings in paid employment as well as a shift in people's willingness to pursue self-employment.

*Paid employment does not include self-employment Source: Statistics Canada and FAO.
